Line

Maxi Moto silencers

the power of **SUONO**®

There are experiences, you should have at least once in your life.

The **Suono line** is the result of the synergetic exploitation of MIVV experience and the ideas of Marabese team, the greatest interpreter of Italian design for the motorcycle sector.

Innovation

A perfect combination of innovative aesthetic and applied technology.
Impeccable assembly, innovative look, performance without compromise.
Suono is a rigorously “made in Italy” mix that is hard to match.

Lightness

Titanium and carbon use, best technical and mechanical features

To keep SUONO's weight down, we chose the best materials available.

- Titanium 1 slow degree, with a wall thickness of just 0.6 mm, resulting in an incidence of just 15% on the total weight.
- 3K 200 gr/mq² twill carbon impregnated with special high-temperature-resistant resins.
- Sound-absorbent can constructed with a blend of high-temperature-resistant CE 14-micron texturized fabrics specially studied for lowering noise – especially at high frequencies.
- Extractable dB-killer pipe studied to guarantee perfect compliance with the current noise regulations and at the same time capable of exalting SUONO's thunderous sound.
- AISI 304 Stainless Steel rivets (4,8 x10) with a shear resistance value of 7.000 Nm and a tensile stress resistance of 4.900 Nm, in order to guarantee the structural stability of the silencer
- CNC-machined AISI 304 Stainless Steel bushing to ensure perfect couplings with the connecting pipes.
- 3K 200 gr /mq² twill carbon fiber fastening strap, to keep high resistance to mechanical stresses.
