

X-cone eternal fascination

High developed technique with an "old school" design, are the features of the new "X"-cone-exhaust system. They can be set up, on naked and super sports models, but also on rétro ones, where the conical forms look very good. The "Seventies" aspect and the passionate

character of "X-cone" silencer are stressed by a details' care: high resistant AISI 304 Stainless Steel, 0,8 mm thick plate. Technical solutions, that give to the bike extraordinary sound and performances.
